

- Advion's unrivalled expertise in mass spectrometry has delivered a mass spec solution just for chemists. Whether you are a biopharmaceutical company, academic research or teaching lab, or any industry requiring routine mass assays, the **expression** CMS delivers high performance in a compact, easy-to-use package at an affordable price.

expression - a versatile (U)HPLC detector with Clarity software

Clarity software from DataApex now supports the **expression** CMS line of mass spectrometers to provide full integration to a broad range of LC and Prep-LC systems. Many chemists focus on one area of research but operate several platforms and utilize different workflows. In combination with Clarity software, Advion's mass spectrometers offer a seamless and flexible solution for mass analysis using chromatography systems from many different suppliers. In addition, **expression** CMS with Clarity software provides analytical chemists with the tools they need for quantitative analysis in a GMP or GLP environment.

- Versatile, easy to use, and feature rich
- Complete instrument control, data acquisition and processing
- Flexible quantitation tools
- CFR21 part11 compliant

Customized solution

Currently, Clarity from Data Apex supports more than 250 instruments and the **expression** CMS range of mass spectrometers will be the first supported by this versatile and easy to use software, providing full integration with LC systems including Agilent, Antec, CVC, GL Science, Young-Lin, Hanon, Ingos, Knauer, LabAlliance, Hitachi, Shimadzu, SSI, ECOM, Rigol and others.
